Gasoline Varies —Just as Crude Oil Does

ORDINARY gasoline varies as widely in its qualities as the crude petroleum from which it is refined.

Many grades of commercial gasoline are one-sided—advantageous perhaps for one purpose, such as quick starting, but lacking in the all-around balance that means consistently smooth, economical running. This one-sidedness may be traced to the lack of diversity in the basic crude.

The improved "Standard" Motor Gasoline is the result of our access to widely varying sources of supply—covering almost every developed field—and our many years of refining experience. Its perfect balance you may prove

for yourself in your own motor. Next time you need gasoline go to the nearest dealer and ask for "Standard." It costs no more than any other. Keep filling up with "Standard" long enough to prove its qualities.

You will soon notice that your motor runs sweeter and cleaner. You will find that you get more mileage per gallon and have less of the more annoying motor troubles. Your spark plugs and valve seats can't carbonize so quickly when practically every drop of the fuel burns clean.

You can now buy this improved motor fuel wherever you motor. It will pay you to fill your tank with it today.
